

Everything You Need

Enable your
business for an
increasingly
connected world

 **OPTIV**

At Optiv, we are committed to helping organizations plan, build and run successful cyber security programs. Our diverse and talented employees partner with enterprise-class organizations to provide a comprehensive suite of products, services and solutions that enable businesses, governments and educational institutions to operate more successfully in a world where everything is increasingly linked together.

From workshops to full security assessments, from technology installations and upgrades to major architecture design and implementation, our unique approach, depth and breadth of offerings, and exceptional team help organizations everywhere rebuild confidence as consumers, employees and investors in a more connected world.

Our Job is to Help You Achieve Success

We Deliver a Path Forward by Balancing Realities and Maturity

Optiv has a rich and successful history based on trust. For more than 30 combined years, Accuvant and FishNet Security – our predecessor businesses – have served as trusted advisors to more than 12,000 clients of varying sizes across a number of industries. Our founders started with a vision to combine best-in-class technology with expert consulting services. We have evolved and grown with the industry, all while carrying forward our proud heritage of cyber security excellence. Today, Optiv is well-known and respected for our innovation and for putting our clients first. We are committed to four essential values:

Leading with perspective as your advisor – we move the industry forward with our unique insights, points of view, ideas and solutions, leading our clients, partners and each other to think beyond the ordinary.

Working in the trenches as your partner – we work shoulder to shoulder with you, understanding your needs as a team member, and acting in the belief that your success is ours.

Delivering real impact as your solver – we dig hard into your problem and evaluate the bigger picture, then unite the optimal people, technology and know-how to execute the most effective solution.

Unlocking tomorrow as your liberator – we are relentlessly focused on enabling your success, liberating your organization and your people to move swiftly on the path to progress.

At Optiv, our only job is to help you achieve success.

In Every Aspect of Our Work, from Developing Successful Information Security Programs to Enabling Operational Excellence, Optiv Focuses on Your Specific Needs

Many organizations have matured to the point that they are demanding that security be considered beyond basic technologies and services. Optiv takes a programmatic approach to solving these clients' security needs. We take into account the diverse range of security strategy, planning and management, monitoring and operations, and defenses and controls.

Our comprehensive capabilities span the entire information security space. We offer a full range of products, services and

solutions to help you define your strategy, identify threats and risks, deploy the right technologies and ensure operational readiness to enable your business through security. And, we have the ability to address your needs at the strategic program level, tactical project level and all levels in between.

Optiv's comprehensive suite of services includes:

Security Program Strategy

We partner with you to create new strategies to plan, build and run effective security programs.

Enterprise Risk and Compliance

We enable you to develop a more secure and resilient organization.

Threat and Vulnerability Management

We provide hands-on expertise that allows you to uncover and remediate threats and vulnerabilities to solve specific security challenges.

Enterprise Incident Management

We help you move from crisis to continuity in the face of an incident.

Security Architecture and Implementation

We navigate complex environments to help you achieve maximum value for your technology decisions, architecture and security projects.

Education and Awareness

We provide cyber security training services that address human behaviors to improve security and reduce risk.

Identity and Access Management

We partner with you to help drive business and reduce risk through intelligent access management.

Managed Security Services

We serve as a remote extension of your team to allow you to strengthen your security response and defenses.

Our Unrivaled Passion for Cyber Security and Being the Best Means Superior Solutions that Work for You

Optiv has an extremely large and skilled team of security experts. Each of our experts is committed to performing research, developing solutions and working with clients – and one another – to solve specific security problems as well as those of the industry at large. Together they form a very well respected group of subject matter experts and thought leaders that represent every category of cyber security.

Our experts are constantly pushing the envelope and synthesizing new information. They're looking at systems and understanding the functions of each individual component to identify new vulnerabilities and pioneer mitigations. They're researching the levels of protection provided by specific technologies, and gaining in-depth understanding of their features and functionality, differentiators

and integration capabilities. They're studying the industry and the market. And, they're working on-site in client environments, applying and continuously evolving their knowledge in unique real-world scenarios.

By combining Optiv's know-how and expertise with the technology and support of our more than 300 premier partners,

we are able to transcend our reach beyond traditional corporate boundaries. As a result, we are able to provide you with better, more effective, more integrated solutions that meet the unique requirements of your specific environment.

Our unrivaled passion for information security and being the best means superior solutions that work for you.
